

In claim 1 at line 2, delete "cellccapable" and insert therefor --cell capable--; at line 4, delete "is reactive with" and insert therefor --binds specifically to--; and at line 5, delete ", non-secretory".

2. (once amended) The monoclonal antibody of claim 1, which further is capable of specifically binding to [and immunologically staining] prostatic epithelium which binding can be detected by an immunological staining method.

3. (once amended) The monoclonal antibody of claim [1] 2, which intensely stains prostatic cancer cells [on the periphery of said cells] with a small degree of heterogeneity and weakly stains normal or morphologically nonmalignant neoplastic prostatic epithelial cells and nonmalignant prostatic ductal epithelium.

In claim 4 line 3, delete "other carcinomas" and insert therefor --non-prostatic cancers--.

7. (once amended) The monoclonal antibody of claim 1 or 2 wherein the cell capable of producing antibody against a prostate epithelium specific antigen is (a) derived from an animal immunized with a cell or components thereof, in which the cell originates from a metastatic lesion of human prostatic carcinoma cells and (b) is selected from the group consisting of spleen cells, lymph node cells, and peripheral blood lymphocytes.

In claim 8 at line 2, delete "are derived" and insert therefor --originating--.

In claim 10 at line 1 delete ", 7 or 8," and insert therefor --or 2,--.

In claim 11 at line 1, delete "monoclonal" and insert therefor --monoclonal--; delete ", 7 or 8," and insert therefor --or 2,--.
